Weight 6½ lbs. complete with ⅛ h. p. universal motor.

One-Half Actual Size

Operates from any lamp socket

100% SAFE

Ten Times Cheaper

than any other cutting method

If You Cut Sheet Metal or Other Flat Stock or Sell to Others Who Do

You want the fastest cutting shear you can get. Why not cut the TIME as well as the METAL?

You can do it with the Motor Driven Mighty Midget UNISHEAR. Easier to handle than a pair of snips and saves your hands, your energy and your time. It's absolutely SAFE—you cannot cut yourself, nor bruise your hands. You can take the shear to the work or the work to the shear.

The Mighty Midget UNISHEAR cuts straight, curved or irregular work with hair-line accuracy. Blades are exchangeable, interchangeable and easily ground. Also cuts aluminum, brass, copper, card-board, linoleum, fibre and other materials.

Use the Mighty Midget UNISHEAR yourself and sell it to shops and industrial plants.

The price of the Mighty Midget UNISHEAR is low and the saving so great it soon returns its cost over and over. Write for detailed information.

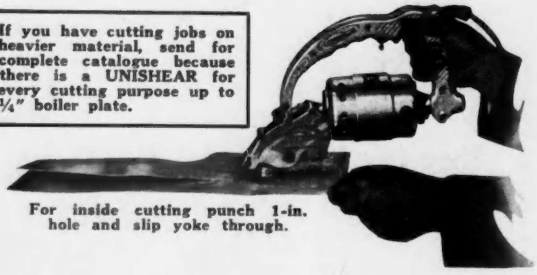
Price $56.00 with 110-Volt Universal Motor
Price $59.00 with 220-Volt Universal Motor

Mounted for use as a Stationary Bench Tool. Price of Cradle, including Yale Lock, $5.00.

MIGHTY MIDGET
SHEAR WITH UNISHEAR

Trademark Registered
U. S. Patent Office
Pat. U.S.A., Nov. 18, 1919
Other Patents Pending

If you have cutting jobs on heavier material, send for complete catalogue because there is a UNISHEAR for every cutting purpose up to ¼" boiler plate.



For inside cutting punch 1-in. hole and slip yoke through.
